

# Token Minting Strategies

## Fixed Supply

## Owner Controlled

## Algorithmic

**Examples:** BTC, LINK

All tokens minted at launch  
No future minting possible

**Trust:** None needed

**Examples:** USDC, USDT

Authorized addresses mint  
Centralized control

**Trust:** High (issuer)

**Examples:** DAI, UNI rewards

Smart contract logic  
No human discretion

**Trust:** Code only

More Decentralized

More Centralized
